

Chemical Exposure Assessments

EMC has the expertise to help you implement chemical control measures.

From office spaces to manufacturing companies, many workplaces expose employees to chemicals. Do you understand the hazards of chemicals used by your organization? Are you adequately protecting your employees? EMC can help you evaluate your current chemical use and determine if less hazardous products or processes are available to help you get the job done with lower risk to your employee.

CHEMICAL EXPOSURE ASSESSMENTS EVALUATE:

- Chemical use
- Control measures (like ventilation systems or personal protective equipment)
- Employee exposures
- Handling and storage practices

USE A CHEMICAL EXPOSURE ASSESSMENT FOR MATERIALS OR PROCESSES LIKE THESE:

- Any activity that creates fumes
- Concrete work
- Electroplating
- Paint and glue
- Solvents
- Welding
- Woodworking

EXAMPLES OF CONTROL MEASURES RECOMMENDED BY EMC:

- Less hazardous substitutions for chemicals
- Ventilation methods to keep fumes away from employees
- Improved storage practices
- Personal protective equipment

Contact EMC Today

EMC loss control representatives are ready to help you improve chemical safety in your workplace. To set up an assessment, contact your local independent insurance agent, EMC loss control representative or email losscontrol@emcins.com.
